

Alternative Solutions offers non-traditional insurance solutions for corporate entities, financial institutions and captive (re)insurance companies. We use a combination of insurance, banking and capital market techniques to deliver bespoke insurance solutions for large or complex risks.

In many cases, we may be able to provide significant risk transfer capacity, as well as risk financing structures. We are also able to leverage our AIG global expertise through access to our extensive multi-national platform.

## Structured Insurance

- for complex or difficult to place risks
- for clients seeking to share in their own risks due to good loss experience
- can assist with cash flow
- cost efficient way to provide evidence of insurance
- enables M&A activity by dealing with risks that are difficult to insure
- can be an alternative to using a captive insurance company

## Liability Buyouts

- buyouts of captive liabilities to enable exposure reduction and possible captive closure, with subsequent release of capital and collateral
- buyouts of on-balance sheet liabilities from corporate clients

## Evolving Risks

- bespoke solutions for currently uninsurable risks (e.g. brand protection, non-damage business interruption, lottery transactions, etc)
